

## Prof. Dr. Arnim Bechmann

Mathematician, physician, and economics teacher (University of Goettingen, TU Hannover, TU Berlin), founder and director of the “Zukunfts-Zentrum Barsinghausen”, and initiator of the “Orientierungs-netzwerk Paradigmenprung”

### Statements about memon technology:

*“Memon technology has the ability to stabilize and promote life processes as well as to protect living systems from strains and dangers of biologically harmful impacts, a real future technology.”*

*“The effect of memon technology may, in principle, be considered proven - with appropriate scientific methods.”*

*“The effect of memon technology is oriented towards the compensation of specific environmental impacts that can be caused by, e.g., athermal electromagnetic strains, geopathic zones, or fine particles on the bioenergetic renaturation of environmental media, such as water, air, and earth, as well as the promotion of the self-regulating ability of plants, animals, and humans towards exterior strains.”*

*“Memon technology is a new, experience-based, innovative pioneer technology.”*
